INSTALLATION MANUAL

All installation work must be performed by a qualified professional installer only.
The manufacturer / dealer is not liable for any kind of incidental or indirect damages.

1

1 This is how the original dashboard looks like.

2

2 Remove the original plastic panel as shown in the picture.

3

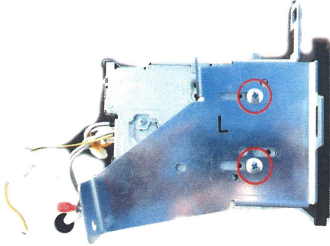

3 Unscrew and save the circled screws and remove the original radio from the radio tunnel.

4

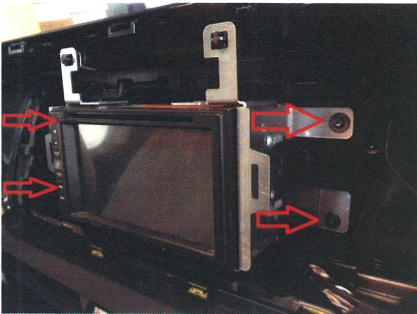

4 Unscrew and save the indicated screws (2 per side) and remove the plastic rack.

5

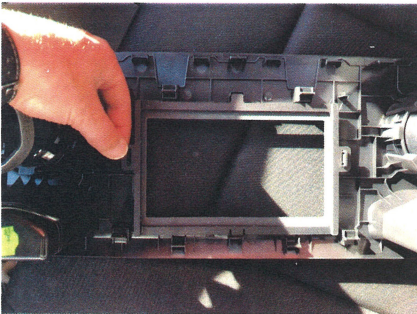

5 Tighten the 4 supplied screws (2 per side) to match the brackets with the body of the radio .

6

6 Connect all cables, verify the proper functioning of the system, install the radio in the radio tunnel and fix the 4 supplied screws as shown in picture.

7

7 Install the supplied fascia plate on the back of the previously removed original plastic panel as shown in the picture.

8

8 Put back in place the original plastic panel.
This is the final result.
