FITTING GUIDE

1. Use a panel removal tool to unclip the trim panel from around the gear stick, and remove the panel

2. Remove the two (2) Torx screws as highlighted by the arrows in the image

3. Remove the OEM fascia panel and climate control unit from the dashboard

4. Remove the radio panel from the climate control unit

5. Remove the plastic at the backside of the panel as highlighted in the image

FITTING GUIDE

6. Reinstall the climate control unit into the dashboard and fit the new fascia panel

7. Push the metal cage into the opening in the fascia panel.

8. Use a screwdriver to attach the brackets to the right and left sides of the aftermarket stereo as shown in the images (right, below)

Use this hole
Use this hole

NB: We advise to use the following positions.
Use Position 1 marked with a cross.
Use Position 10 & 12 marked with an arrow.

9. Reconnect all wiring to the aftermarket stereo and test for correct operation.

Push the aftermarket stereo into the dashboard until it clips into place, and surround the stereo with the trim panel to complete the installation
